

# Quarterly Report for the Period Ended 31 March 2024

Kingsrose Mining Limited (ASX: KRM) ("Kingsrose" or the "Company") is pleased to provide an update on its activities for the March 2024 quarter.

#### **HIGHLIGHTS**

- Cash balance of A\$26.75m at 31 March 2024 (31 December 2023: A\$27.25m).
- Permitting of drilling at Penikat continues to progress positively.
- Further consolidation of the Råna nickel-copper-cobalt project ownership.
- Kingsrose is in ongoing exclusive negotiations with BHP regarding future exploration of the Finnmark and Central Finland early-stage exploration areas.
- The acquisition of an advanced critical minerals exploration project remains a key focus for Kingsrose.

#### **EXECUTIVE SUMMARY**

Work on permitting drilling programmes at the high-grade PGE-nickel copper Penikat project in Finland continued, with the Natura Assessment for Area 1 having been submitted in September 2023. In January 2024, the Centre for Economic Development, Transport, and the Environment (ELY) and Metsähallitus (government forestry landowner) determined that the proposed exploration drilling will not have a negative impact on the integrity of the Natura 2000 area. In March 2024, an application for a derogation permit was submitted to the Ministry of Environment and a decision on the permit applications is expected in Q1 FY25.

Following on from involvement in the innovative BHP Xplor program, Kingsrose is in ongoing exclusive negotiations with BHP regarding future exploration of the Finnmark and Central Finland early-stage exploration areas where Kingsrose has continued to develop a number of compelling large-scale exploration target areas.

Additionally, Kingsrose exercised an option to acquire a 100% interest in a large area of exploration licences to further consolidate the Råna project and is progressing towards acquiring a 51% interest under the Råna joint venture agreement.

The Company remains well funded with A\$26.75 million in cash as at 31 March 2024.

In line with previous statements, a key component of the Kingsrose strategy continues to be the acquisition of a more advanced critical minerals exploration project, to complement the existing portfolio by offering a nearer-term value creation opportunity through defining mineral resources and a potential development pathway. A significant proportion of the team's efforts during the quarter have been directed towards these efforts, with a number of opportunities under review including focused due diligence and site visits.

#### **EXPLORATION & OPERATIONS**

### Company Updates

During the quarter total exploration costs associated with the Penikat, Porsanger, Råna and BHP Xplor projects (Figure 1) were A\$806,828.

#### Råna Project, Norway

Final assay results from the Ranbogen and Bruvann drilling program were announced on 5 February, and on 4 March 2024 the company also announced that, in accordance with the Option Agreement with VIAD Royalties AB (Optionor), a wholly owned subsidiary of EMX Royalty Corp (EMX) it has exercised the option to purchase 100% of Råna Nickel AS (Target). Råna Nickel AS is a Norwegian incorporated entity that holds a 100% interest in 19 exploration licences

ASX:KRM

(EMX Licences) totalling 183 square kilometres adjacent to the brownfield Råna Nickel-Copper-Cobalt (Ni-Cu-Co) project held by Kingsrose under a joint venture.

Final assay results from the 2023 drill program announced on 5 February 2024 included hole 23RAN004 which intercepted an up-dip extension from hole 23RAN002 (see ASX announcement dated 23 October 2023) and the discovery of a new zone of mineralised massive sulphide at the Malmhaugen prospect (Figures 2 and 3), coincident with an extensive conductive magnetotelluric (MT) geophysical anomaly.

#### Hole 23RAN004:

1.4 metres at 1.8% Ni, 0.2% Cu, 0.19% Co from 233.9 metres.

In addition, final assays from hole 23BRU005 demonstrated that mineralisation is open 200 metres west of the Bruvann mine. This is an area with no previous drilling and where mineralisation is not evident at surface due to gneiss hanging wall rocks concealing the deeper host intrusion. This hole intercepted narrow but high-grade nickel mineralisation and remains open:

#### Hole 23BRU005:

- 2.6 metres at 1.0% Ni, 0.1% Cu, 0.03% Co from 414.9 metres, including
- 0.6 metres at 3.2% Ni, 0.3% Cu, 0.07% Co from 416.9 metres.

The Company has earnt a 10% interest in the Råna Project by the issue of 10,000 shares in Narvik Nikkel AS, the joint venture company that operates the Råna Project. The Company intends to proceed to earn the second milestone interest by incurring \$3 million of expenditure on the Råna Project within three years. This will result in Kingsrose moving to a 51% interest in the Råna Project.

#### Finnmark and Central Finland Regional Exploration Projects (formerly supported by the BHP Xplor program)

Kingsrose is in ongoing exclusive negotiations with BHP regarding future exploration of the Finnmark and Central Finland early-stage exploration areas (Figure 1). These exploration licences, including the Porsanger project, are subject to a Right of First Refusal in favour of BHP as described in Kingsrose ASX announcement dated 18 January 2023.

### Penikat Project, Finland

No exploration work was conducted at the Penikat project during the quarter, whilst permitting for drilling is being advanced.

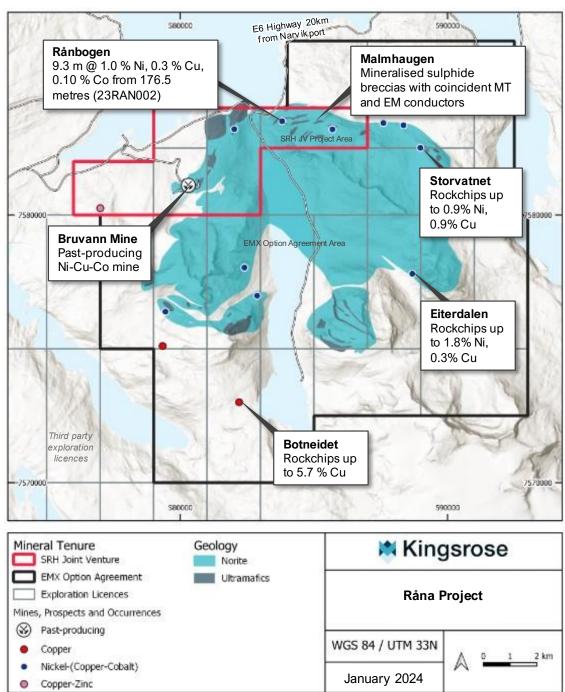

Figure 2: Råna project location, geology, and exploration licences

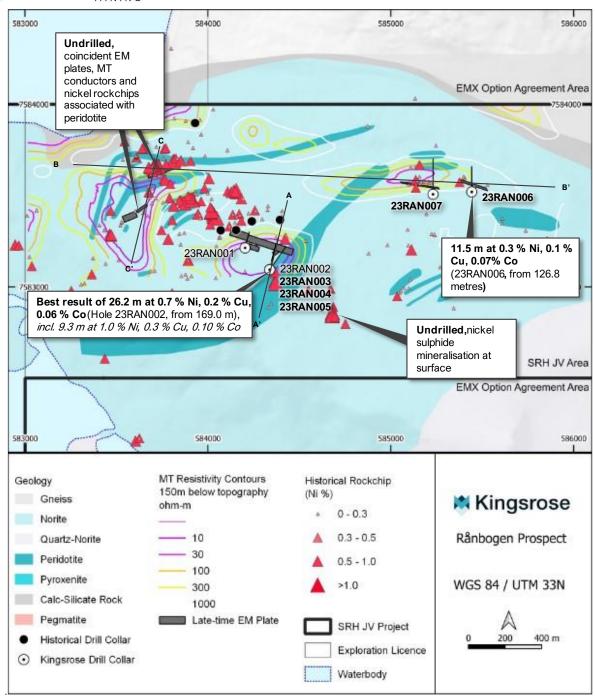

Figure 3: Rånbogen project, Rana Project, showing drill hole locations, geology, MT conductive anomalies and EM modelled plates.

#### SUSTAINABILITY & PERMITTING

#### Råna Project, Norway

Local stakeholder engagement has continued, which included landowners, the municipality, and local businesses. Feedback on the Project and the Company have been largely positive, with much anticipation for the results of ongoing exploration works. Prior to the greenfield drilling program, baseline flora and habitats studies were completed by a local consultant. These studies informed completion of the greenfield drilling programs with minimal ground disturbance.

#### Penikat Project, Finland

As a significant portion of the Penikat project area lies within the Martimoaapa – Lumiaapa – Penikat Natura 2000 site, the exploration licence applications must be supplemented with a Natura Assessment Report.

The Company submitted a Natura 2000 Assessment Report (the Report) for the Ala-Penikka area (Area 1) (Figure 4) to the local Environmental Regulatory Body (ELY) in September 2023. This was followed by a productive face-to-face meeting. Highlights of the Report include:

- Submission of the Report satisfies the key requirement to apply for an exploration licence in Natura 2000 protected areas.
- The Report concluded that the potential impacts of proposed exploration activities were either not present or insignificant and localised.
- With consideration of the permitting process, the Company anticipates that exploration activities may be able
  to commence December 2024, noting that delays related to public appeals and regulatory processes are
  possible.
- The Report, and planned subsequent report for Areas 2-5, are intended to secure approvals for 443 drill pads and associated access routes for an initial four-year exploration licence which may be extended to a maximum of 15 years.

In January 2024, ELY and Metsähallitus determined that the proposed exploration drilling will not have a negative impact on the integrity of the Natura 2000 area. In March 2024, the derogation permit was submitted to the Ministry of Environment.

Through mapping of the permitting regime, Kingsrose has been able to establish milestones and associated timeframes and develop an increased level of clarity in the permitting process.

Details of the permitting process and associated timeframes are summarized in the permitting roadmap provided in Figure 5.

#### Finnmark Regional Exploration Project, Norway

At the request of the Ministry of Trade and Fisheries of Norway, Kingsrose delivered a detailed report to support its application to drill at the Karenhaugen (Sami translation: Karenvarri) prospect, within the Porsanger area. The report included findings from ecological and archaeological surveys to assist with planning the drilling without impacting Indigenous sites or protected species and habitats. In January 2024, the Ministry of Trade and Fisheries approved the application for a Special Permit. However, the case has been referred to the King in Council for further consideration.

A comprehensive stakeholder engagement framework has been developed to support exploration activities during CY2024.

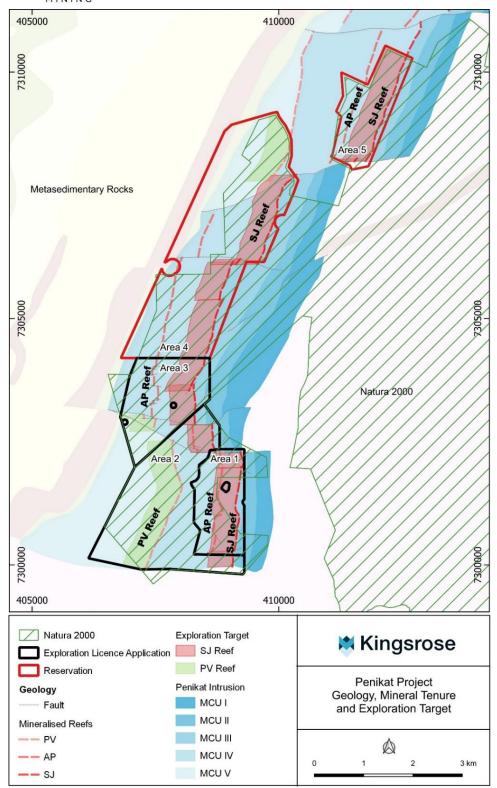

Figure 4: Kingsrose mineral tenure and geology of the Penikat Project, Finland.

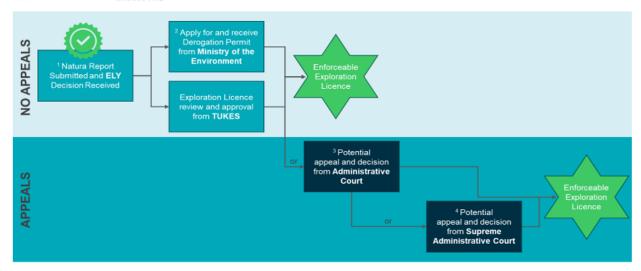

Figure 5: Simplified Permitting Roadmap, Penikat Project, Finland.

#### **Explanatory Notes:**

- <sup>1</sup> The quality of the Natura 2000 Assessment Report and strength of a positive ELY statement may reduce timeframes.
- <sup>2</sup> There is not a prescribed timeframe for a decision by the Ministry of Environment, however a positive statement by ELY and proactive engagement by TUKES is believed to support a six-month timeframe.
- <sup>3</sup> An appeal to the Administrative Court is likely, but not certain.
- <sup>4</sup> An appeal to the Supreme Administrative Court is unlikely due to the quality of the Natura report and the anticipated positive statement from ELY and endorsement by TUKES.

#### **CORPORATE**

#### Cash and Term Deposits

 As of 31 March 2024, Kingsrose had a cash balance A\$26.75m (Q2 A\$27.25m) allocated between cash and available term deposits. This represents a quarter-on-quarter reduction of A\$496k in the cash balance of which an unrealised foreign exchange gain on the Group's USD cash term deposits contributed A\$1.2m to the result.

#### Cashflow and Expenditure Review

- Net cash from used in operating activities was A\$875k for the quarter (Q2 A\$1.68m). Expenditure during the
  quarter within this category covers administration and corporate costs, business development and investor
  relations activities, staff costs being salary and related payroll for corporate employees, and corporate specific
  exploration costs. Overall expenditure of the quarter was in line with expectations.
- Net cash used in investing activities was A\$803k for the quarter (Q2 A\$1.43m) and was line with expectations.
   Expenditure during the quarter on exploration and evaluation activities was A\$807k with the majority of this occurring at the Råna Project in Norway.
- Net cash used in financing activities was A\$17k for the quarter (Q2 A\$17k) and represents payments for leased right of use assets.

#### Related Party Payments

• Payments of \$156,000 reported in Item 6.1 of the attached Appendix 5B relate to the remuneration paid to the Managing Director & CEO, as well as fees paid to Non-Executive Directors (including superannuation).

#### **Capital Structure**

• The following provides a summary of all securities on issue as at 31 March 2024:

Ordinary Fully Paid Shares 752,526,519
Options 34,750,000
Performance Rights 4,100,000

#### About Kingsrose Mining Limited

Kingsrose Mining Limited is a leading sustainability-conscious and technically proficient mineral exploration company listed on the ASX. The Company has a discovery-focused strategy, targeting the acquisition and exploration of critical mineral deposits having Tier-1 potential. This has resulted in the acquisition of, or joint venture into, the Råna nickel-copper-cobalt, Penikat PGE and Porsanger PGE-nickel-copper projects in Finland and Norway. Additionally, Kingsrose was selected for the first cohort of the BHP Xplor exploration accelerator program which operated from January to June 2023.

#### Forward-looking statements

This report includes forward-looking statements, including forward-looking statements relating to the future operations of the Company. These forward-looking statements are based on the Company's expectations and beliefs concerning future events. Forward-looking statements are necessarily subject to risks, uncertainties and other factors, many of which are outside the control of the Company, which could cause actual results to differ materially from such statements. The Company makes no undertaking to subsequently update or revise the forward-looking statements made in this announcement to reflect the circumstances or events after the date of this announcement.

#### Competent Persons Statement

The information in this report that relates to the Exploration Results at the Råna Project was first reported by the Company in compliance with the 2012 edition of the JORC Code in ASX announcements dated 18 January 2023, 6 July 2023, 21 July 2023, 8 August 2023, 4 September 2023, 23 October 2023 and 5 February 2024.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the ASX releases referred to above and it further confirms that all material assumptions and technical parameters underpinning the exploration results and exploration target continue to apply and have not materially changed.
